

Autodesk® Revit® Structure Goes to College

INTERTECH Design, Inc. (IDI), a Dallas-based structural engineering firm and subsidiary of Curtain Wall Design and Consulting, Inc. (CDC) has partnered with Autodesk to obtain a grant for 21 seats of AutoCAD - Revit Structure Series to provide the foundation for the new engineering program at University of North Texas (UNT). Based on IDI's

to structural analysis, estimating, and green building design software applications concomitantly with traditional construction document methodologies.

Mr. Ikerd is developing the syllabus to ensure engineers are prepared to leverage new BIM system technologies, like Revit Structure, in building design, yet still provided an appropriate grounding in
